REMARKS

We are in receipt of the Office Action dated June 10, 2003, and the above amendment and the following remarks are made in light thereof.

Claims 1-35 are pending in the application. Pursuant to the Office Action, all of the pending claims are rejected under 35 USC 102(e) as being anticipated by Yamazaki et al. US Publication No. US 2001/0040655.

By way of the present amendment, each of the independent claims 1, 10, 19 and 27 is amended to require that the projected surface of the pixel electrode have a radius of curvature from 0.1 to 4 μm . Support for this limitation is found in the specification on page 10, lines 19-24. Yamazaki et al. fails to teach this feature. Accordingly, applicant submits that rejection for anticipation is overcome.

Applicant believes that the application is now in condition for allowance, and an early Office Action in this regard is earnestly solicited.

Respectfully submitted,

Dated: 9 September 2003
